

BOTHWELL I. SHUMBA

DATA ANALYST

Qatar, Doha | **Cell:** (+974) 33389634 | **Email:** bothwellshumba@gmail.com
Project Portfolio Site: <https://bothwellishumba.github.io/Portfolio/>

PROFESSIONAL SUMMARY

Data Analyst with 5+ years of experience delivering insights from large-scale, high-volume datasets, including time-series and event-based data. Strong expertise in SQL and Python (pandas, NumPy) for analytics, KPI design, and anomaly detection. Proven experience building self-service dashboards to support Customer Success, Sales Engineering, and leadership teams. Comfortable working with modern analytical warehouses and collaborating closely with engineers to enable data-driven decision-making

CORE SKILLS

- SQL (Advanced) – Complex joins, window functions, time-series analysis
 - Python – pandas, NumPy, Jupyter for ad-hoc analysis and anomaly detection
 - Analytics Warehouses – BigQuery, Snowflake, Amazon Redshift; ClickHouse (working knowledge)
 - Data Transformation & Pipelines – dbt fundamentals, analytical modeling, materialized views, Airflow/Prefect
 - BI, Metrics & Data Ops – Power BI, Tableau, Superset/Metabase, KPI design, Git, REST APIs & data extraction
-

EXPERIENCE

Data Analyst | Noema Consultancy | Qatar | 2023

Developed SQL- and Python-based analytics on large datasets (100K+ records) to enable trend analysis, anomaly detection, and KPI monitoring. Built and maintained self-service dashboards in Power BI and Tableau for executive, FP&A, and stakeholder reporting. Performed time-series analysis to identify trends and outliers, improving forecast accuracy by up to 20%. Created reusable analytics logic and standardized metric definitions, collaborating closely with engineers and stakeholders to translate business needs into scalable analytical solutions.

Data Analyst | Sarh Alqerma | Qatar | 2020 - 2022

Analyzed operational and project data using SQL and Python to support planning, performance monitoring, and SLA tracking across teams. Built KPI dashboards in Power BI and Tableau to improve visibility into progress, resource utilization, and compliance. Automated recurring reports with Python and SQL, reducing manual effort by 25–30% and accelerating insight delivery. Integrated data from multiple systems to identify bottlenecks and anomalies, while supporting stakeholders through ad-hoc analysis, data validation, and clear communication to non-technical audiences

EDUCATION:

BSc Data Science

B.Tech IT

IBM Professional Data Scientist Certification – IBM

SAP Data Analyst Certification – SAP
